

6<sup>th</sup> October 2017 – For Immediate Release

Software Alliance Limited ("SAL"), the developers of the award-winning Mo.net financial modelling platform, today announces the release of Mo.net 7.0. The release includes a range of 6 new product components, 99 new features and enhancements and 38 defect fixes.

The Mo.net platform is comprised of a range of complementary tools and services designed to meet the needs of a range of different user groups and business applications. Product components are now deliberately segregated between model development, development & operational governance, delivery to production and enterprise consumption activities. You can view and understand more about these components on our website [www.softwarealliance.net](http://www.softwarealliance.net).

'we are very pleased to provide our clients with the most significant evolution of the modelling platform to date. Our vision is to be the primary financial modelling platform that supports the needs of all aspects of the end-to-end life insurance business lifecycle, and the work we have undertaken to release Mo.net 7 has initiated this journey.' stated Laura Edwards, the Director of Business Development for Software Alliance.

If you are looking for a solution to the next generation of end-to-end Insurance Modelling then consider Mo.net and Software Alliance.
