

25th May 2018 – For Immediate Release

Software Alliance Limited ("SAL"), the developers of the award-winning Mo.net financial modelling platform, today announces the release of Mo.net 7.2. The release includes a range of new features, minor enhancements and improvements primarily focused on:

- extending the seamless integration & governance features of the platform, with the added flexibility of being able to analyse or debug live service requests
- refining & standardising the overall user experience / look & feel of the user interface, and
- further enhancing development and operational performance

"we are very pleased to provide our clients with the next evolution of Mo.net. 7.2 delivers addition features that further supports our vision to offer a single financial modelling platform for each stage of the insurance business lifecycle" stated Laura Edwards, the Director of Business Development for Software Alliance.

If you are looking for a solution to the next generation of end-to-end Insurance Modelling then consider Mo.net and Software Alliance.
