

Press Release

6th November 2024 – For Immediate Release

Mo.net 7.7

We are delighted to announce the release of Mo. net 7.7. This innovative release incorporates new features and enhancements to existing functionality that makes the development, deployment, integration, and consumption of models & calculations faster, easier, and more controlled.

We highly recommend upgrading to Mo. net 7.7 to leverage the full potential of the platform. In case you require any assistance, please don't hesitate to contact us, and we will gladly provide support.

We are confident that the new features and enhancements will streamline your modelling experience and exceed your expectations.

What you will love about Mo.net 7.7

Enterprise & Cloud Integration

- Integration with Web Data Sources for tables and tasks have been added
- Enhancements to Mo.net Quotations Service endpoint
- Support for latest version of .NET Framework
- Additional SQL-based integration added for data connections
- Mo.net Worker Service made available on the Azure Marketplace

User Experience

- Mo.net CodePilot added to Mo.net Development Studio
- Additional sample projects added to Mo.net Model Development Studio
- Enhanced capability around licence activation and deactivation
- Improvements to the comparison functionality within Mo.net Model Development Studio
- Additional feedback added to Mo.net Quotations Router Service use

Performance & Scalability

- Enhancements to worker functionality to optimise worker use across nodes
- Enhancements to Mo.net Quotations Service data caching and start-up performance
- Increased robustness when auditing Mo.net Quotations Service events

Governance & Control

- Additional flexibility and optionality for auditing Mo.net Quotations Service events
- Additional security features added in conjunction with using the Mo.net Quotations Service
- New source control connector added
- Realtime view of active users across Mo.net components
- Enhancements to user access/activity reporting
